David S. Madole  
david@madole.net

Made in honor of, and with gratitude to,  
Roger Pitkin, owner of Quest Electronics,  
who created the original computer this  
is a recreation of, circa 1977.

Made also in memory of Joseph Weisbecker, designer of the

COSMAC 1802 microprocessor, which inspired and enabled the  
creation of this machine and many other educational and

hobbyist computers. These systems helped thousands start  
their computer-related careers and hobbies. Thank you.
